To whom it may concern:

I have been utilizing the services of Louisiana Recovery Services since 2002. The service that we have gotten and the returns on our income have been very good. The employees at LRS are very courteous when we call, and from the feed back that we do get from patients are kind and respectful to them also. If there is any questions about whether we have filed insurance on a particular patient account, they will fax us a request for more information, or pick up the phone and give us a call. They work just about any claims. We were using a service several years ago who went out of business. They sent us a list of claims they were working, but not a complete list of accounts that were turned over to them. So there was a lot that was just sitting out there not being worked. We have since hired someone to go through the collection charts, and accounts, and have been sending them to LRS, with very good results. I find their collection fees are very reasonable, and are comparable to what we were paying in the past.

I would recommend LRS Collection Service without any reservations.

Thank you,

Kathy Romero
